

How do people  
and our planet  
work together?

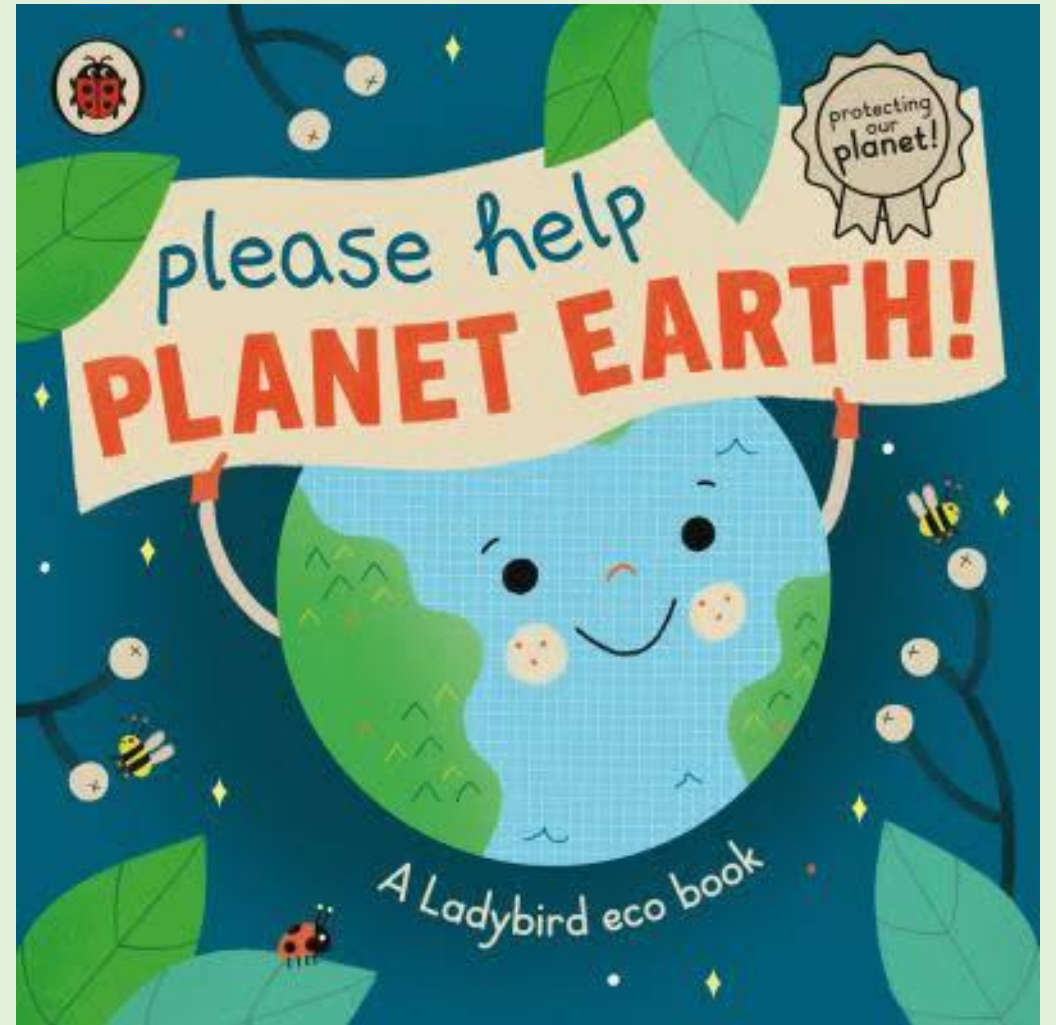

*Easby Immersion Week!*

We have had lots of fun  
learning about our planet,  
Earth!

We read the story 'Please Help Planet Earth' and talked about all of the things we can do to help our planet stay happy and healthy.

We learnt the word Recycling!  
We know that when we recycle,  
instead of throwing things in  
the bin, we use them for  
something else.

We learnt how to recycle the  
paper towels we use to dry  
our hands.

First we had to tear them into  
little pieces

Then we put the paper into the blender with some water. It made a loud sound as it chopped and mixed.

We used a Mould and Deckle to form the gloop into rectangles. We waited for our rectangles to dry, it took 3 days!

Our paper was ready! We will use it in our final product...

We have been learning about different materials! We went on a litter pick with our Kirkstall friends. They helped us to name and sort the materials.

We have been learning about  
how our planet helps to feed us!  
We talked about where different  
plants grow.

Our First Spring  
Expedition!

Planet Protectors

Our Immersion Week made us so excited to begin our Expeditions! We started off by learning about another kind of recycling - making compost. We prepared the compost bin, saved all of our snack rubbish and even went on a hunt for some wriggly helpers...

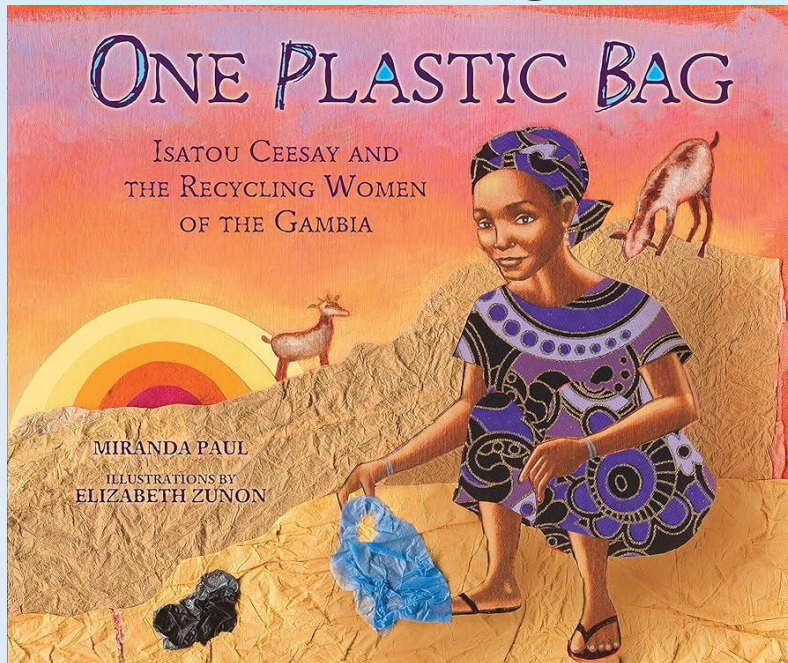

We learnt that we needed creatures to eat our leftover snacks and turn it into compost! We took our shovels and went onto the field to find worms!

We continued to learn about the ways that we can be Planet Protectors!

We read the story One Plastic Bag, and were inspired by Isatou Ceesay who used recycling to clean up her village.

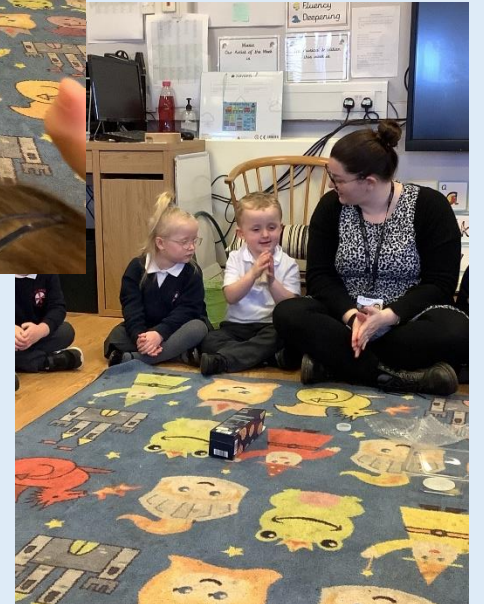

We recycled the rubbish we found on our litter pick and made our very own toys!

As part of our Communication and Language learning, we learnt how to use our 5 senses to describe a range of materials.

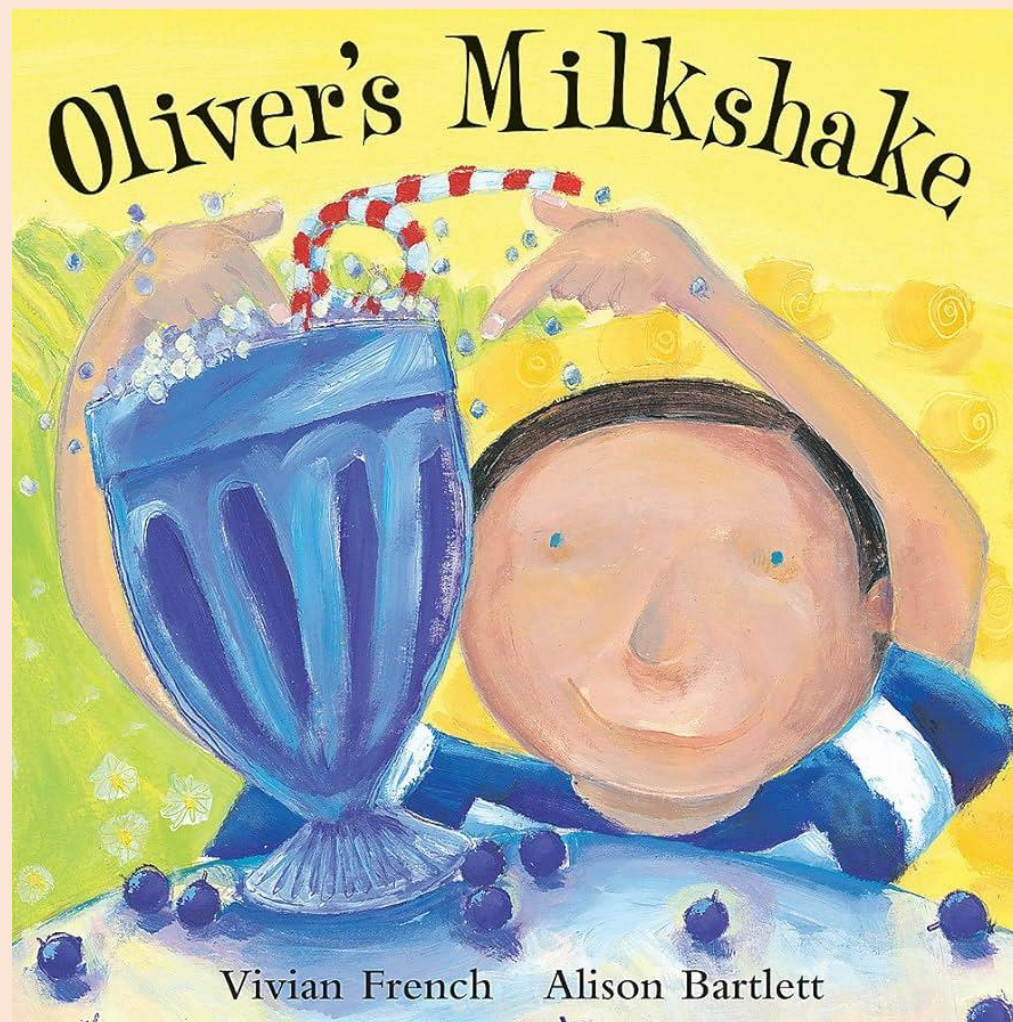

To teach our school community how to be planet protectors, we created beautiful posters to display! We used our phonics knowledge to write captions linked to the pictures we drew.

Our Second Spring  
Expedition!

Growing and Making

Our new focus story is Oliver's  
Milkshake!

We have been learning all about farms. Miss Hinchcliffe taught us about the different jobs that must happen on the farm. We enjoyed getting our suits on and taking part in farm jobs!

We enjoyed tasting a range of different fruits. We used our 5 senses to talk about each one. Some were sour, some were sweet and delicious!

We decided which fruit  
was our favourite and  
drew pictures of them. We  
will use our favourite  
fruits to make  
milkshakes just like  
Oliver!

We designed our own milkshakes! We used our phonics knowledge to write the list of ingredients we need to make our designs.

We had so much fun reading our recipes and making our own milkshakes to drink. They were delicious!

Our Final Product

Presenting our recipe book  
to our grown-ups!
